

Women Gynecology & Childbirth Associates,

We wish to inform you about important insurance information regarding your coverage for obstetrical ultrasound examination.

Some insurance companies do not include these services in the global charges for obstetrical care.

According to most insurance plans you may be allowed only one routine ultrasound examination per pregnancy. If additional ultrasound exams become medically necessary, we will submit any needed documentation to your insurance company along with the claim. Claim payment is not a guarantee until it has been reviewed and approved by your insurance company.

If you have further questions regarding this, please call our billing office at (585) 244-4360 or you can contact your insurance carrier directly. We know this may be an exciting yet anxious time for you and we are here to help you.

Sincerely,

The billing staff at Women Gynecology
and Childbirth Associates, PC
